JOINT REPORT OF THE VICE-CHAIRMAN AND THE DIRECTOR

June 30, 1965

The Honorable John J. McKeithen
Governor of the State of Louisiana
Baton Rouge, Louisiana

Dear Governor McKeithen:

The Vice-Chairman and the Director of the Board of Administrators of the Charity Hospital of Louisiana of New Orleans submit the following report of the activities of the Hospital for the fiscal year July 1, 1964 through June 30, 1965.

The following members served on the Board of Administrators:

His Excellency Governor John J. McKeithen,
Ex-officio President

Dr. Leo J. Kerne, M.D., Director

Honorable Don L. Peterson, Vice-Chairman

Mr. Edward S. Bopp	Dr. John L. Kron
Mrs. Mary H. Connolly	Dr. Daniel P. McIntire
Dr. Allen J. Ellender Jr.	Mr. A. N. Simmons Jr.
Mr. William J. Guste Jr.	Mr. Carl T. Smith Jr.
Dr. Allen A. Copping	Dr. Maurice O. Weilbacher
Mr. Harold P. Haydel	Dr. Gilbert C. Tomskey
Dr. Richard W. Hughes	Mr. George Van Kuren, deceased

The Associate Directors were:

Dr. Louis Burroughs

Dr. John Adriani

Mr. Andrew P. Richard II, Secretary and Associate
Director

Mr. Weldon Talley was appointed Treasurer.

The following were appointed chairmen of the following committees:

Dr. Richard Highes, Chairman Finance Committee

Dr. Gilbert Tomskey, Chairman Medical Committee

Dr. Carl T. Smith Jr., Chairman of the House
Committee

The Assistant Clinical Directors as follows;

Dr. Charles Mary Jr.

Dr. Hamp Pratt

Dr. James Weilbacher

The cost of operation for the period of July 1, 1964 to June 30, 1965 has increased \$1,570,501 as compared with the previous year, the largest increase being in Salaries which increased \$1,377,266.

Total Capital expenditures for the year were \$143,231.00. Equipment purchases amounted to \$91,210.00 while in 1964 the hospital purchased \$154,561.00. However major repairs increased substantially this year, \$52,021.00 as compared to \$6,250.00 for the previous year.

During the fiscal year plans were being made to start a building program and in conjunction with this the following were given the priority:

Priority #1 Replacement of the Contagious Building and Foundations sufficient to support the twelve (12) story building estimated to cost \$2,180,000.00.

Priority #1 A Classrooms and completion of the Student Nurses Home at an estimate of \$1,125,000.00 plus \$1,150,000.00 in matching Funds.

ACKNOWLEDGMENTS

The Chairman and the Director of the Hospital wish to express their appreciation to the Sisters of Charity for their splendid cooperation and excellent services rendered on numerous occasions; also, to the various members of the Board of Administrators for their valuable time and services rendered during the year, and the Department Heads and the entire personnel of the Hospital for their Wonderful Loyalty and cooperation.

Respectfully submitted,

HONORABLE DON L. PETERSON, D.D.S.
Chairman, Board of Administrators

LOUIS BURROUGHS, M.D.
Director

SUBJECT:
REPORT ON HURRICANE "BETSY"

On the morning of September 9, 1965, when it seemed apparent that Hurricane "Betsy" would strike the City, all Department Heads were contacted and instructed to take the necessary precautions to assure continued operation of the hospital as well as prepare to handle a large number of casualties. At 1:00 P.M., the Associate Directors and Assistant Clinical Directors met with key Department Heads to discuss what steps had been taken to cope with the storm.

Nursing Service had set-up an additional ninety (90) beds in the Lapeyre Miltinberger Building and Main Building with an additional fifty (50) beds available on a standby basis. It was estimated that an additional 200 beds were vacant and available on the various wards. Also, temporary measures were taken to house patients in the clinic areas in the event of a power failure. Delivery and operating rooms were established on the first floor with all necessary medical and surgical supplies. Blood was stored in the blood donor's station. Medical supplies and materials were moved to the clinic and accident room areas for immediate use. The Maintenance Department closed the flood gates at the Morgue entrance and the door was re-enforced with sand bags. Plywood had been stored in the clinic area to repair window damage in critical areas and all maintenance vehicles had a full tank of gas. Pumps were set up in the elevator pits and main transformer vault and ready to go in the event of flooding. The Engineering Department had an adequate diesel fuel supply to operate the emergency generator and was preparing to begin operating the steam generator at 6:00 P.M. since it takes two or more hours to have it in full operation. In the Traffic Department, all ambulances were in operation and additional drivers assigned to duty. The Dietary Department had sufficient food for at least a ten day period.

When the meeting was about to close, an up-to-date report on the storm placed the City directly in its path. Instructions were issued for all key department heads and as many of their personnel as possible to remain on duty. All personnel were permitted to go home to take the necessary steps to protect their homes and families before returning to duty.

By 8:00 P.M., the hospital was in readiness to meet the storm and we were in the process of evacuating some thirty-five (35) patients from the St. Bernard Nursing Home. During this evacuation one of our ambulances broke down and was later covered by the flood water.

During the height of the Hurricane when there was complete power failure in the City, the hospital generators supplied

power to the entire hospital. Shortly before midnight, the roof of the transformer vault on the 19th floor was blown away and part of it crashed into the transformers shorting it out which cut off all electric power to the center of the hospital. This affected all floors except the first, second and twelfth floors. With this power failure, many of the premature infants on the 9th floor had to be relocated into a makeshift nursery on the East Wing. This was done without loss of life. The hospital was still able to function effectively despite the power failure.

There were extensive damages to windows as well as screens and some roof damage. Maintenance crews were able to board up windows in critical areas and no patients were injured by flying glass. On some wards patients were moved from damaged and broken windows to insure their safety.

There were over two hundred (200) residents and interns in the hospital proper together with Doctors Carter, Ellicoarpe, Welder, Race and myself who remained on duty all night to coordinate operations. During this period from Thursday through Sunday, the Dietary Department not only fed the house staff and patients but also fed all employees who were on duty during that time.

On the morning after the hurricane the hospital was in contact with officers from the Fifth District Police Station who were requesting medical supplies, physicians and nurses. Volunteer physicians, senior nurse students and supplies were dispatched to the shelters set up to care for the flood victims. Later confusion developed about whether or not more physicians were needed. To get first hand information, two of the Assistant Clinical Directors volunteered to visit the areas to investigate. They returned after several hours and felt that adequate medical help was available. We continued to send physicians, nurses and supplies in an effort to relieve those who had been working as many as 16 to 24 hours. Some who returned volunteered to go back after a few hours rest. Very few patients were brought to the admit room since most would be adequately treated in the shelters and suffered from exposure, minor cuts and bruises. Since many of our nursing personnel were unable to report to work on Friday, student nurses were assigned to the general wards. In fact, the entire junior and senior students in the school of nursing were deployed at one time or another to the hospital wards or to the various shelters.

Two of our residents who volunteered to assist at the Municipal Auditorium were dispatched to the Mayor's office and remained there for four days assisting in organizing evacuation activities.

On Saturday, the second day after the hurricane, we continued to send medical staff and supplies to the shelter victims.

Many persons who lost all medicine, etc. in the flood began coming to the hospital. Most were diabetics, epileptics, and cardiac patients and were given medicines from the pharmacy. The diabetics were given syringes as well as insulin. Also, a large number of mothers with infants and children came for treatment. Most were hungry and we fed them. Others had minor G. I. complaints that did not require admission. For a while it looked as if the hospital would become a shelter but we were successful in getting most of them to a suitable shelter. Anticipating a large influx of critically ill patients on Saturday, we discharged about 200 patients who were not in dire need of hospitalization.

On Sunday, power was restored to the central part of the hospital and the hospital functioned as if there had been no hurricane. On Monday, two temporary hospital units were established at the _____ High School Gym and the Ozanim Inn to take care of the nursing home type patients. These hospitals were staffed by LSU and Tulane faculty and resident staff respectively. Approximately 80% of the residents and interns staff volunteered their services to these hospitals and shelters.

In conclusion, I want to say that it would be impossible for me to single out any one person or department for their dedication and devotion to duty. Many worked for as long as 40 hours straight and others reported to the hospital for duty even though their very homes were ruined by the flood waters. In all, our employees worked more than 4,900 hours overtime from Thursday night to Monday morning. Such dedication deserves our highest praise.

The Hospital is also grateful for the cooperation of the local radio and television studios for their assistance in helping us to communicate with our employees and patients. We are also grateful to the many Drug Firms who offered and delivered large supplies of needed medicines and to business concerns who donated soft drinks and groceries.

Due to the full coordination of all departments who were aware of what each was doing, the hospital was prepared for Hurricane "Betsy" and functioned smoothly without incident of panic among patients or employees throughout the disaster. You can be assured that it will be equally prepared to handle future disasters and care for the needs of the citizens of the greater New Orleans area and the state of Louisiana.

Respectfully submitted,

LOUIS BORROUGHS, M.D.
Associate Director

BOARD OF ADMINISTRATORS

JOINT REPORT OF THE VICE CHAIRMAN AND THE DIRECTOR

June 30, 1965

The Honorable John J. McKeithen
Governor of the State of Louisiana
Baton Rouge, Louisiana

Dear Governor McKeithen:

The Vice-Chairman and the Director of the Board of Administrators of Charity Hospital of Louisiana at New Orleans submit the following report of the activities of the hospital for the fiscal year July 1, 1964 through June 30, 1965.

Dr. Don L. Peterson introduced to members of the Board the Governor's representative, Mrs. Mary Evelyn Parker, Commissioner of Administration. Mrs. Parker expressed her pleasure in representing the Governor and her interest in Charity Hospital. Further, Mrs. Parker extended the Governor's regrets that he could not personally conduct the organizational meeting because he had not yet fully recovered from his recent illness. As his representative, Mrs. Parker conveyed the wishes of the Governor that the newly appointed Board of Administrators of Charity Hospital give careful consideration and attention to the recommendations of the Study Committee he has earlier appointed to study and make recommendations for the affairs of Charity Hospital. After six months, and again at the end of one year, the Governor has asked that he be furnished a progress report by the Board on its success in achieving the recommendations of the Study Committee. He has pledged his full cooperation to the Board and he has promised to do everything possible to assist Charity Hospital to reach its maximum potential.

Mrs. Parker called for nominations from the Board for Vice-Chairman. Dr. Don L. Peterson was elected Vice-Chairman of the Board and Leo J. Kerne was re-elected Director.

The following members serve on the Board of Administrators:

Mr. William J. Guste, Jr.
Dr. John L. Kron
Dr. Gilbert C. Tomskey
Dr. Allen J. Ellender, Jr.
Dr. Daniel P. McIntire
Mr. Carl T. Smith
Mr. A. N. Simmons, Jr.
Mrs. Mary Connolly

Dr. Don L. Peterson
Dr. Allen A. Copping
Dr. Richard W. Hughes
Dr. Maurice O. Wellbaecher
Mr. Edward S. Bopp
Mr. George Van Kuren
Mr. Harold P. Haydel

The Members on the various committees are as follows:

Medical Committee

Dr. Gilbert C. Tomskey, Chairman	
Dr. Allen A. Copping	Dr. John L. Kron
Dr. Allen J. Ellender, Jr.	Dr. Daniel P. McIntire
Dr. Richard W. Hughes	Dr. Maurice O. Wellbaecher

House Committee

Mr. Carl T. Smith, Chairman	Mr. Edward S. Bopp
Mr. A. N. Simmons, Jr.	Dr. Allen J. Ellender, Jr.
Mr. George Van Kuren	Mr. Harold P. Haydel

Finance Committee

Dr. Richard W. Hughes, Chairman
Mr. A. N. Simmons, Jr.

Mr. Edward S. Bopp
Dr. Daniel P. McIntire

Implementation Committee

Mrs. Mary Connolly
Mr. William J. Guste, Jr., Chairman
Dr. John L. Kron

The cost of operations for this period increased \$1,570,591.00 over the previous year. The largest increase of \$1,377,266.00 was in salaries. Drugs and Surgical Supplies increased \$100,565.00. There was a decrease in Repairs and Maintenance in the amount of \$21,858.00.

In July, an implementation Committee was established at the request of Governor McKeithen to study ways and means for the overall improvement of the Administration of the Hospital.

In October the renovation and air conditioning of the first five floors of the student nurses' residence was completed. Also the restoration and water-proofing of the Dibert T. B. Building, Professional Student Home, Interne Home, Laundry, Electrical Building and the ambulance garage.

Dr. Hughes and Mr. Bopp with the assistance of the investment firm review the hospitals investments and thru their efforts the hospital will eventually realize \$100,000.00 more.

In February 1965, Mr. George Van Kuren, a Board Member of Charity Hospital for eighteen years of continuous service, passed away and was replaced by Mr. Louis E. Thomas, Jr.

ACKNOWLEDGEMENTS

The Vice-Chairman and the Director of the hospital wish to express their appreciation to the Sisters of Charity for their splendid cooperation and excellent services rendered innumerable capacities; also, to the various members of the Board of Administrators for the valuable services rendered through this year and to the department heads and the entire personnel of Charity Hospital for their wonderful Loyalty and cooperation.

Respectfully submitted,

DON L. PETERSON, D.D.S.
Vice Chairman
Board of Administrators

LEO J. KERNE, M.D.
Director

Prior to the regular order of business, Dr. Peterson asked that all members of the Board rise in silent prayer for the late Mr. George Van Kuren who had served continuously on the Board of Administrators since his appointment in 1948 and who passed away on February 3, 1965. On motion of Mr. Guste, seconded by Mr. Bopp, the Board then unanimously approved the following resolution as a memorandum to Mr. Van Kuren:

RESOLUTION ADOPTED BY THE BOARD OF ADMINISTRATORS
OF CHARITY HOSPITAL OF LOUISIANA AT NEW ORLEANS
EXPRESSING SORROW UPON THE DEATH OF BOARD MEMBER
GEORGE VAN KUREN

WHEREAS, the Board of Administrators of Charity Hospital of Louisiana at New Orleans has noted with sorrow the untimely demise of George Van Kuren; and

WHEREAS, George Van Kuren, actuated by his concern for, and sympathy with the ills of the poor, the lowly and the indigent, gave unstintingly of his time, his talent, his wise counsel and service in many capacities during a period of over eighteen years as a member of this Board; and

WHEREAS, his genial disposition, dynamic personality and devotion to duty fitted him ideally for membership on the Board of this great Hospital; and

WHEREAS, his friendship, close attention to Hospital affairs and interest in the welfare of the patients will be sorely missed by Board members, the medical staff and patients;

NOW, THEREFORE, BE IT RESOLVED

That the members of the Board of Administrators express their sympathy and hereby extend to the bereaved members of Mr. George Van Kuren's family sincere condolences on their great loss; and direct that this resolution be ordered spread upon the minutes of this meeting, and that an attested copy thereof be sent to the Van Kuren family.

COMMENTS ON OPERATIONS

June 30, 1965

The cost of operations for the period July 1, 1964 to June 30, 1965, as compared with the same period last year increased \$1,570,591.26 as per the following summary:

	1965	1964	Increase or Decrease*
Salaries	\$12,202,353.37	\$10,825,086.95	\$1,377,266.42
Food	906,792.39	973,374.83	66,582.44*
Drugs & Surgical Supplies	2,108,849.76	2,008,284.36	100,565.40
Repairs Maintenance	242,387.18	264,245.59	21,858.41*
Other Operating Expenses	1,948,770.14	1,767,569.85	181,200.29
Total Cost of Operations	\$17,409,152.84	\$15,838,561.58	\$1,570,591.26

Cost of operations for the month of June, 1965, as compared with May, 1965 increased \$39,839.10 as per the following summary:

	June	May	Increase or Decrease*
Salaries	\$ 1,092,373.92	\$ 1,042,696.97	\$ 49,676.95
Food	73,142.14	68,855.13	4,287.01
Drugs & Surgical Supplies	123,853.26	173,071.58	49,218.32*
Other Operating Expenses	110,853.42	76,134.43	34,718.99
Repairs & Maint. Bldg. & Equip. ..	20,597.78	21,395.69	797.91*
Hosp. Cont. to Ret. Plan & FOAB	73,151.04	71,978.66	1,172.38
Total Cost of Operations	\$ 1,493,971.56	\$ 1,454,132.46	\$ 39,839.10

COMPARATIVE

ANALYSIS—PERSONAL SERVICE COST

	June	May	Increase or Decrease*
Resident Physicians	\$ 65,755.90	\$ 65,787.50	\$ 31.60*
Interns	13,825.00	14,052.47	227.47*
All Other Staff Doctors	30,764.62	31,180.12	415.50*
	\$ 110,345.52	\$ 111,020.09	\$ 674.57*
Registered Nurses	\$ 122,963.53	\$ 124,733.79	\$ 1,770.26*
Practical Nurses	70,984.90	65,265.15	5,719.75
Nurse Aides	169,438.49	167,136.43	2,302.06
	\$ 363,386.92	\$ 357,135.37	\$ 6,251.55
Other Personnel	\$ 614,041.48	\$ 569,941.51	\$44,099.97
Sisters of Charity	4,000.00	4,000.00
Professional Services	600.00	600.00
	\$1,092,373.92	\$1,042,696.97	\$49,676.95

By actual payroll count, 135 persons were employed and 140 released during the month of June for a decrease of 5 per the following:

	June	May	Increase or Decrease*
Registered Nurses	302	317	15*
Practical Nurses	273	282	9*
Nurse Aides	814	850	36*
All Other Personnel	2,222	2,167	55
	3,611	3,616	5*

PERSONNEL DEPARTMENT

This year great improvements and advances were made with the approval of our Board of Administrators and the Department of State Civil Service.

1. Pay scales for twenty-six classifications were increased.
2. The Breaux Building was closed and employees were placed in other Hospital divisions.
3. Pay differentials were granted Graduate Nurses working evening and night shifts.
4. Twenty-five employees elected to retire under the provisions of the Louisiana State Employees' Retirement System.
5. Nursing Aide Training Classes were started, each class for a period of six weeks and consisting of fifteen students.
6. The Hospital again participated in the Public Employees' Training Institute, sending four of its staff to the P. E. T. I. Meetings.

Employees of the Hospital also came in for special honors during the year:

1. Mrs. Eola K. Strauch, Medical Laboratory Technician IV received honorable mention in the Charles E. Dunbar, Jr. Career Service Award.
2. Forty-six employees of the Hospital were awarded Outstanding Service Ratings in March.

During the year, there were an average of 4,065 positions on the books. We employed an average of 115 persons a month, resigned an average of 120 persons a month and discharged an average of 9.4 persons each month.

This has been a year of stress and sorrow due to the illness of Charles C. Sturtevant, Personnel Director, but it has been one in which we enjoyed the complete cooperation and consideration of the Administration and of all members of the staff. This cooperation is deeply appreciated.

Respectfully submitted,

/s/ ALICE B. FORTIER
Acting Personnel Director

NURSING SERVICE DEPARTMENT

Director, Sisters' Division

Sister Alphonsa, R.N., B.S., F.A.C.H.A.

Director, Nursing Service

Sister Regis, R.N., B.S.N.Ed.

Assistant Directors	3
Coordinator, Inservice Education	1
Instructors, Inservice Education	4
Cardiac Nurse Specialist	1
Professional Nurse Staff:	
Supervisors	
Daughters of Charity	12
Lay Supervisors	6
Assistant Supervisors	77
Head Nurses	131
Staff Nurses	
Full Time	71
Part Time	13
Nonprofessional Staff:	
Practical Nurses	285
Psychiatric Aides	17
Nurse Aides II, III and IV	711
Nurse Aides I	73
Nurse Aide Trainees	15
Operating Room Technician Trainees	9
Central Service Workers	138
Custodial Workers	31
Clerical Workers	97
Miscellaneous	23

A comparison of the above figures with those of the last annual report shows the number of staff nurses to be almost the same, an increase in the head nurse group, stability at the supervisory and administrative levels, and a definite drop in the number of practical nurses. The decrease in the number of miscellaneous positions is a result of recording the Operating Room Technician Trainee positions separately.

The tables below show the turnover in the professional and practical nurse staffs for the past two fiscal years and the reasons given for termination of employment.

TABLE I

	Employments		Resignations	
	1964	1965	1964	1965
Professional Nurses	132	115	141	130
Practical Nurses	70	76	78	84

Removal	0	1	0	5

The increase in the beginning salaries of graduate nurses at the I, II and III levels and the incredible salary adjustments given on February 1, 1965, enabled the department to successfully recruit and to maintain the professional nurse staff at its 1964 level. Charity Hospital salaries for professional nurses compare favorably at this time with those of other hospitals and health agencies in New Orleans. Minimum monthly salaries were changed as follows during the past fiscal year:

Graduate Nurse I	From \$320.00 to \$360.00
Graduate Nurse II	From \$360.00 to \$380.00
Graduate Nurse III	From \$380.00 to \$420.00
\$20.00 per month differential for evening and night work	

The salaries for practical nurses I and II are too low to enable Charity Hospital to obtain or hold an effective practical nurse staff. Very few in this group of employees were eligible for the salary adjustment given in February, nor was money available for meritorious raises when due. These factors have had adverse effect upon the morale of the practical nurses at Charity Hospital. Resignations are being submitted at an alarming rate, and absence from duty because of personal and family illnesses is increasing daily. These conditions at times place an almost inhuman burden on the more responsible practical nurses, most of whom are assigned to evening and night duty. Recommendations made to the hospital administrators to improve working conditions for the practical nurse staff bear repeating and are as follows:

1. Approve a beginning salary for practical nurses I and II at one step above the present minimums.
2. Grant meritorious increases to practical nurses in all classes upon completion of six months of satisfactory service, and yearly thereafter.

The nurse aides remain a stable group in providing for patients the routine and comforting care so essential to complete recovery. A request for additional nurse aide positions, urgently needed to supplement the services of the professional and practical nurses, is still pending action. It is earnestly recommended that this request be given priority consideration.

The amount of money spent for p.r.n. nursing decreased one third after January, 1965. This was probably due to the constant filling of vacant nurse positions on the new and higher salary and to the differential pay for afternoon and night duty. During this last half of the fiscal year, after the differential pay went into effect, nursing care of the patient was provided by professional nurses rotating on 1696 shifts of afternoon or night duty.

These figures do not include the professional nurses employed for permanent afternoon and night duty.

The reorganization of the Nursing Service Department has moved along in a satisfactory manner. Motivated by positive results from the division of the Fourth Floor into two areas, each with a full-time nursing supervisor, this plan was placed in effect on the Fifth Floor. The improvement in patient care and employee work performance following this action is encouraging, and the assignment of nursing supervisors to smaller patient areas may prove to be the solution to some of the many problems harassing nursing service administrators today. In October, 1964, the Nursing Service Office began operating seven days a week instead of five, thereby providing continuity of service to patients and to the nursing staff. The assignment of a second Sister Supervisor to night duty further extended nursing administrative services and is making the night duty personnel keenly aware of the skills and responsibilities involved in providing an environment which is therapeutic for the patient. Moving the patients from the Breaux Building to the Dibert Building afforded a more efficient and economical operation of the nursing services for tuberculous patients and made nursing personnel available for reassignment to services with pressing needs for additional nurses and nurse aides.

The services of the Cardiac Nursing Specialist is of inestimable value in promoting quality nursing care for adult medical and surgical patients with cardiovascular diseases. Emergency cardiac carts have been placed in the patient units on the medical and surgical floors, and a recent survey revealed that in the past two months these carts have been used 57 times to save patients' lives. Weekly conferences on the nursing care of the cardiac patient are held on the medical units. Teaching and consultant resources of this type have stimulated interest and developed understanding and skills in cardiac nursing.

The Nursing Service Executive Committee has met monthly to appraise nursing service needs, resolve problems and propose changes for the improvement of patient care. The Nursing Service and Nursing Education Coordinating Committee held several meetings to discuss matters of mutual concern encountered in educating the students in the Charity Hospital School of Nursing and those from the affiliating nursing schools. The Committee on Nursing Procedures has completed an extensive revision of the Nursing Procedure Manual, and it is anticipated that the revised manual will be printed and available for distribution by September, 1965.

On hospital services where the patient turnover is constant, nursing services were provided for 11,335 patients in the Recovery Room, 9,056 deliveries and 314 Caesarean sections in the Delivery Room, and 6,444 outpatient visits to the Health Clinic by students, interns and residents and their families, employed professional and practical nurses and department heads. In addition, this service gave 699 immunizations for Influenza, 880 for Smallpox, 443 for Diphtheria, 300 for Typhoid Fever and 92 for Tetanus.

Because of a sustained high census in the Premature Infant Nursery and in May, 1965, the admission of an unusually large number of small babies weighing less than 1200 grams, the nursery was closed several times to outside admissions during the year. This occurred two weeks in September and October, 1964, three weeks in December, 1964, and two weeks in May, 1965. Piped in oxygen was installed in Nursery IIA and five new intensive-care Isolettes were purchased. There is now a total of 23 Isolettes in the Premature Infant Nursery.

Educational Responsibilities

The rapid changes in medical management of patients and the scarcity of applicants prepared to do nursing makes on-the-job training obligatory in the Nursing Service Department. Orientation to duty was given to 155 newly employed professional and 13 practical nurses. Group conferences in

clinical nursing ward administration at the head nurse level, and for the purpose of demonstrating nursing procedures and equipment were held regularly throughout the year. Practical nurses, staff nurses, head nurses, supervisors and administrative nurses at various times during the year attended short-term courses designed to focus attention on quality nursing service. These courses were sponsored by the Charity Hospital Nursing Service Inservice Education Staff, the Louisiana State Board of Health, the Louisiana State Department of Hospitals, and the National Institute of Health, the Louisiana Heart Association, the National League for Nursing, the Interdivisional Council of the New Orleans League for Nursing, the Louisiana State Nurses' Association, the U.S. Department of Labor Bureau of Apprenticeship and Training, the U.S. Air Force, the New York Medical College, the American Cyanimid Company, and the American Occupational Therapy Association.

In December, 1964, funds were secured from the U. S. Federal Government through the Manpower Development and Training Act for the training of hospital nurse aides. The services of three nurse instructors and two part-time clerical workers were obtained and nurse aide training under this new program was started. Four classes with a total of 40 nurse aides completed the intensive 12-week training course and all were employed in Charity Hospital. The total estimated cost of the training project amounted to \$20,991.30.

The Operating Room Technician Training Course, which is offered twice each year, is a one-year training program set up to teach the mechanical skills required in Operating Room service. It is not intended, nor should it be considered, as a substitute for professional nurse training in the Operating Room. The class is conducted by one professional nurse instructor, with the cooperation of the staff physicians of the Department of Anesthesiology. From June 1, 1964, through July 30, 1965, thirty students were enrolled in the program. Of this group, twenty-one completed the course, five of whom are employed on the staff.

Fifteen students are presently enrolled. The trainees are employed by the hospital through the Louisiana State Civil Service System and are classified as Nurse Aides II. Upon completion of the course, the trainee is promoted to a Nurse Aide III with a \$15 per month increase in salary. There is no further opportunity for promotion, and since Operating Room Technicians are in great demand, the turnover in this group of employees is very large, and Charity Hospital is in the position of training Technicians to be employed in the Operating Rooms of other hospitals. The following indicates the small number of trained Technicians who have remained on the staff after completing the course at Charity Hospital:

Class of January, 1962—One technician still on the staff

Class of April, 1964—Five technicians still on the staff

Class of June, 1964—One technician still on the staff

Class of February, 1965—Fourteen students enrolled, nine remain in the class which will complete the program in February, 1966.

Recommendations concerning the Operating Room Technician training program are:

1. That the class be removed from Louisiana State Civil Service in order to provide a wider range of qualified applicants.
2. That the basic salary paid to the students while they are trainees be lowered, to be increased as their ability increases.
3. That a higher salary be paid to the graduate technicians to enable us to retain these employees after they are trained.
4. That an assistant instructor be employed to make the program more plausible.
5. That the status of these employees be clearly defined by Nursing Service.

Educational programs in premature infant nursing were planned and conducted by the nursery staff for 10 resident physicians, 35 medical students, 2 professional nurses, and 27 student nurses from the Touro Infirmary and Mercy Hospital Schools of Nursing. In addition, three weeks of inservice education in premature infant nursing was given to nurse aides. Dillard University's Department of Nursing was again the only professional nursing school that rotated its students through the nursery for clinical experience and practice in the nursing care of premature babies.

Through joint planning with the Schools of Nursing affiliating with Charity Hospital for clinical nursing experience, 57 professional nursing students from Mercy Hospital School of Nursing and Louisiana State and Dillard Universities, and 72 practical nursing students from the L. E. Rabouin Vocational School and the Booker T. Washington High School were rotated through the services required for an education in nursing. The wealth of clinical experience available on the wards may be likened to a magnet, attracting nursing educators to Charity Hospital seeking nursing experience for students, and the Nursing Service Department is hard pressed at times to provide these facilities.

The Nursing Service Office Staff continued to participate in the educational programs of other hospital departments. Formal instruction in nursing service functions and nursing procedures were held for Charity Hospital student nurses, medical technician interns and x-ray technicians. Ten one-hour lectures on Nursing Practices were attended by 37 student technicians from the Department of Diagnostic Radiology.

Interest in community health activities was maintained throughout the year. Nurses from the staff participated in meetings and programs of the New Orleans Hospital Council, the Louisiana Hospital Association, the New Orleans Heart Council, the Louisiana Heart Association, the Louisiana Committee on Rehabilitation, the Tuberculosis Association of Greater New Orleans, the American Red Cross Nurse Enrollment and Disaster Committee, the American Nurses' Association, the National League for Nursing and on the Rehabilitation of Alcoholics.

Among Louisiana State employees entering retirement were 12 from the Nursing Service Department. The lengths of service varied from 13½ to 30 years, and the number in the classifications represented were 5 professional nurses, 3 nurse aides, 2 clerical workers, 1 hospital matron and 1 Central Service worker.

The Department of Nursing Service has been diligent and productive in fostering quality nursing care by keeping abreast of information and products that would enable us to utilize nursing personnel, supplies and equipment effectively. The use of disposable syringes has already been initiated, and we are soon to establish use of pre-wrapped sterile dressings. Since it is a proven fact that nurses are hampered by many non-nursing duties, we have made a first step toward relieving this situation by establishing Clerk positions on the Fourth and Fifth Floors, with the expectation of eventually classifying these positions into Unit Managers, after further study is made of positions and functions. This will be a giant step toward progress in the Nursing Service Department and a morale boost to our professional staff.

If the Nursing Service Department is to preserve the gains it has achieved and is to serve as an integral part of the administration of the hospital, with standards and goals that are compatible with those of the hospital as a whole, the following recommendations should be given serious consideration:

1. That a representative from the Department of Nursing Service be on all hospital committees concerned with patient care.
2. That an out-patient service be established which would facilitate health service to all employees, and that the Health Clinic for nurses be incorporated into this facility.

3. That meritorious salary increases be granted to personnel as they become due, since money for personal services is budgeted and allocated.
4. That a study be made of the feasibility of establishing more administrative positions for the purpose of maintaining control of residents and interns and of educational and research projects, and to collaborate with the Department of Nursing Service in making known the patient and personnel needs on the various services.

We would like to take this opportunity to express to Dr. Kerne and his associates, and to the Board of Administrators, our sincere appreciation for their concern with our Nursing Service problems and for their untiring efforts to assist the Nursing Service Department in all of its endeavors in the field of patient care. We are grateful to the administrative staff for the consideration which they have manifested toward the Nursing Service Department, and we assure you of our continued cooperation, interest and support.

Respectfully submitted,

/s/ SISTER REGIS, R.N.
Director

DIETARY DEPARTMENT

To the Board of Administrators and Doctor Louis Burroughs, Acting Director
Charity Hospital of Louisiana at New Orleans
Gentlemen:

The Annual Report of the Dietary Department for the fiscal year beginning July 1, 1964 and ending June 30, 1965, is herewith respectfully submitted:

ACTIVITIES AND ACCOMPLISHMENTS

The Dietary Department operated with essentially the same number of employees as the previous year; however, there was an increase in the number of meals served to patients; also, the number of infant formulas prepared. The number of meals served to personnel remained approximately the same. There was a significant decrease in the number of special meals served.

During the economy drive starting in February, the Dietary Department fully cooperated and succeeded in a total savings of \$60,039.55 on food.

The activities of the various Dietary Department Units are covered in the following order:

1. Main Kitchen, Storeroom and Personnel Food Service
2. Patient Food Service
3. Formula Room
4. Student Nurses' Residence
5. Nutrition Clinic

MAIN KITCHEN, STOREROOM AND PERSONNEL FOOD SERVICE

The Cook IV resigned and that position still remains unfilled.

A checker has been employed for the Doctors' Dining Room for the purpose of checking the eligibility of people eating there.

New equipment includes the following:

1. Eighty chairs for the Doctors' Dining Room, bringing the total to 155.
2. Three stainless steel tray trucks.

Major repairs were necessary for the Patient's oven, which was out of order a number of times.

Loose floor tiles were regROUTED throughout the Main Kitchen area.

The smallest of the cafeterias was closed. The personnel formerly served there are now eating in the Nurses' cafeteria.

The Employees' Dining Room was air-conditioned.

All cafeterias were re-painted. Travel posters were framed and hung in all cafeterias.

Comperative figures of meals served are as follows:

	1964-1965	1963-1964
Patient Meals	2,004,141	1,922,503
Personnel Meals	1,074,085	1,078,587
Total Meals	3,078,226	3,001,090
Special Meals Served	57,034	160,167
Patients Nourishments	167,034	-----
Formula Room Census	121,877	118,951

PATIENT FOOD SERVICE

The patient menu cycle was changed to consist of 2 weeks of menus to be alternated. This was done to simplify and facilitate central ordering by the Main Kitchen. Calculations, evaluation, and recommendations were made on the menus to maintain their nutritional adequacy. Main kitchen now assumes full responsibility for food service to the 6th Floor Infirmary.

The revised Dietary Department Employees' Handbook was distributed to all employees in patient food service. There was an updating and repetition of the regular meetings held twice monthly for all patient food service employees. A series of fourteen classes were taught by the Therapeutic Dietitians from November through May.

Patient food service was modified on 9th Floor and in the Dibert Building. On the 9th Floor, the juvenile meals are now served on the wards from hot food carts. This results in their getting warm food which is more palatable. They also receive forks, knives and spoons instead of just spoons.

All patients from the Breaux Building are now in Dibert. The food service was adopted to serve the increased number of patients in Dibert and also to utilize the five new heated food carts which were purchased for Dibert. All patient food is placed on trays in the kitchen and then sent up to the floors on the heated carts. Cafeteria service for ambulatory patients had to be discontinued because of the limited space.

In Dibert, a storage area formerly used by the Housekeeping Department was renovated to store and heat the new hot food carts.

Equipment purchased for the patient food service is as follows:

1. One Stainless Steel Utility Cart for 5th Floor.
2. Five Heated Tray Conveyor Food Carts for Dibert.

Repeated repairs have been made on equipment.

Painting in the above areas is as follows:

1. 3rd Floor Office and Pantry (Main Building)
2. Elevator Doors and Metal around Doors (Main Building and Pantry Elevators)
3. Isolation Building Pantry and Dishroom.

In order to familiarize the new doctors coming to Charity Hospital with diets and procedures, the Charity Hospital Diet Manual was again made available to all the House Staff desiring a copy.

Periodic tours of the department were conducted for Student Nurses, Medical Technologists, Visitors and other interested groups.

FORMULA ROOM

Routine repairs were made on equipment, particularly the bottle brush machine.

NURSES' HOME

The Student Nurses' Home Dining Room and Dietitian's Office were completely renovated to include air-conditioning. New fixtures, and a fire escape door and steps were installed in the Dining Room. The kitchen was repainted.

New equipment purchased by the Department includes the following:

1. One 30 gallon Stainless Steel Steam Kettle.
2. One Stainless Steel Tray Truck.
3. One Venetian Blind.
4. Six sets of Draperies.

As in the past the coffee urn needed repeated repairs.

NUTRITION CLINIC

PATIENTS—For the year starting July 1, 1964, 14,148 patients were instructed on special diets. Of these, "new reduction" diets totaled 1,048, and reduction revisits were 2,095.

The number of diabetics instructed individually and reviewed on their diets was 4,118. In addition to the individual instructions, 191 patients, relatives, attendants, and students attended a session of the diabetic classes held every Friday afternoon. These classes are presented primarily to give supplementary instruction to the hospitalized patients to help them when they go home.

Various other special diet instructions included the following diets, variations, and combinations: normal, normal for child, soft, bland, milk and cream, dumping syndrome, colostomy, low residue, high protein, low protein, low phosphorus, low purine, low fat, low saturated fat, low cholesterol, ketogenic, gluten-free, wheat-free milk-free egg-free, elimination for child (allergy), and sodium restricted. These totaled 2,313. 3,681 obstetric patients were instructed in classes, which are held daily.

3,681 normal pregnancy

91 toxemia

676 toxemia-reduction

25 reduction

Total "broken appointments" for revisits of reduction or various other diets were 1,756.

PERSONNEL—87 student nurses came to the Nutrition Clinic, 8:30 a.m. until noon for five days: one, two, or three each week. They were orientated, given assignments, watched demonstrations, then they instructed patients.

A volunteer worker was assigned to Clinic for six weeks during July and August. She worked Mondays, Wednesdays, and Fridays, 9:00 a.m.-2:30 p.m., and was an exceptionally willing and efficient worker.

The staff relief dietitian was scheduled for the Nutrition Clinic to learn the Charity Hospital routines. This was part of her orientation into all the therapeutic units.

At the request of the resident in charge, the Tulane Medical Interns in the Diabetic Clinic were given a briefing on the Charity Hospital diabetic diets. Three interns were instructed in February and five in March.

The Charity Hospital Practical Nurse students were divided into three groups which attended the Friday afternoon sessions of the diabetic classes. Three groups of Touro Infirmary student nurses attended sessions, also.

Two classes of Charity Hospital Nurse Aide trainees were given 1½ hour lectures on feeding patients, stressing the need for cooperation between the Dietary and Nursing Service Departments. The trainees are under the In-Service Education Program.

Many visitors and student groups were shown around the Nutrition Clinic and given a briefing on the work done.

Several employees come to the Clinic regularly to check their weight and discuss their diets. These fellow-workers come from various departments.

APPRECIATION

Our gratitude is extended to Dr. Kerne, Dr. Burroughs, Dr. Adriani, the Board of Administrators, the Sisters, the Medical and Nursing Staffs, the Engineering, Maintenance, Personnel and Purchasing Departments, and all other Departments of the Hospital, for the cooperation, assistance and encouragement they have given us this past year.

Respectfully submitted,

/s/ CLYDE B. MOORE
Food Service Director

HOUSEKEEPING DEPARTMENT

The annual report of the Housekeeping Department for the fiscal year beginning July 1, 1964 and ending June 30, 1965, is herewith submitted.

The turnover of personnel, including Housekeeping, Linen and Sewing Section and Professional Student Home Section was seventy-seven. Of this number there were 54 resignations, 18 removals and five retirements.

Seven employees were promoted to higher classifications in the department, and four were promoted by transfer to other departments.

With the closing of the Breaux Building, fourteen housekeeping positions from this building were absorbed in other sections where additional help was needed.

Thirty housekeeping employees were granted Outstanding Ratings by the State Civil Service Department, and were presented with certificates on May 27, 1965.

Window cleaning services continued to be done by contract with the National Building Services and Maintenance Company.

Consultation services were renewed with the A. & M. Pest Control Company to assist in an advisory capacity and checking with Housekeeping Administration twice a month on special problems or needs.

In the Central Linen Section a Pilot Study was commenced on two floors with a linen control and pack system of distribution, which required all emergency linen on all three shifts to be kept under lock and key, and the morning distribution of linen to be put in packs for a.m. care. The system

is working out very satisfactory, and the system will be extended to other areas soon. Linen replacements were made this year as follows:

8,446 Large Sheets (adult beds)	413 Slings
8,272 Sheets 54" (roller)	774 Hamper bags
1,374 Crib sheets	72 T Binders
1,261 Bassinet sheets	48 Brest binders
2,063 Bedspreads	300 Dresser scarfs
6,442 Pillow cases	240 Leggings
1,042 New blankets 66" x 90"	4,072 Restraints
3,012 Baby wraps	120 Spring covers (Koroseal)
400 Crib blankets	182 Coffee bags
965 New pillows	532 Thomas splints
4,964 Patient gowns (adult)	147 cs Disposable pads
6,348 Childrens gowns	3,411 Large Birdseye pads 30" x 36"
1,611 Pajama suits	2,100 Bassinet pads 18" x 30"
383 Additional pajama pants	25 Roller pads, polyurethane
978 Childrens pajamas	17 Rx table pads
2,000 Robes	12,828 Wrappers for sterile supplies
961 Plastic mattress protectors (adult)	816 Slit sheets
91 Crib mattress protectors	736 Special pieces 36" x 36"
859 Plastic pillow covers	432 Eye sheets
56 Plastic covers for equipment	8,244 Bath towels
23,412 Birdseye diapers	7,640 Huck towels
133 cs Disposable diapers (400/cs)	2,200 Kitchen towels
97 cs Disposable diapers (576/cs)	12,966 Surgical towels
774 Hamper bags	6,253 Terry wash cloths
378 Bathroom curtains	132 cs Disposable wash cloths (500/cs)
137 Cubicle curtains	1,162 Aprons
336 Armboard covers	3,436 Doctors caps
800 Bassinet shields	780 Doctors operating gowns
110 Basket liners	1,350 Doctors scrub suits
332 Blood pressure app. cuffs	244 Additional scrub trousers
300 G U bags	2,635 Nurses first gowns
144 Infusion bottle bags	644 Nurses second gowns
	995 Reversible smocks

Respectfully submitted,

/s/ SISTER CLARISSE

PHYSICAL THERAPY

Dr. L. J. Kerne, Director
Charity Hospital of Louisiana
New Orleans, Louisiana

Dear Dr. Kerne:

The Physical Therapy Department has continued to administer physical therapy treatments to patients referred from all divisions of the hospital.

Members of our staff have participated in various teaching programs for medical students, nurses, and orientation of ancillary personnel.

A statistical summary of the department's activities is appended.

Respectfully submitted,

/s/ NATHAN H. POLMER, M.D.
Medical Director
Physical Therapy Department
(per) I. Johnson

NHP/lj

HEART STATION

The accompanying report shows the work performed in the Heart Station from July 1, 1964 through June 30, 1965. The figures refer to the number of electrocardiograms taken in each month, and to the number of arterial oxygen saturation studies, cardiac catheterizations, angiocardiograms, cardiac fluoroscopic examinations, and vectorcardiogram examinations.

Many sound tracings of the heart were made during the current year but the breakdown by months is not available although the data were placed in the patients' records. Dye dilution studies accompanied many of the cardiac catheterizations.

During the year cardiac clinics were conducted every Monday and Tuesday afternoon in order to maintain a closer check on patients with heart disease. There was also a pediatric clinic which is conducted every Friday.

Also, during the year approximately sixteen (16) patients had catheter pacemakers inserted. There were approximately twenty-five (25) patients whose cardiac arrhythmias were treated utilizing the D. C. shock apparatus.

I. Electrocardiograms			
July	3,452	January	3,254
August	3,190	February	3,190
September	3,369	March	3,471
October	3,306	April	3,617
November	2,829	May	3,299
December	2,809	June	3,146
TOTAL			38,931
II. Arterial Oxygen Saturation Studies			
			176
III. Cardiac Catheterizations			
			170
IV. Angiocardiograms			
			172
V. Cardiac Fluoroscopic Examinations (Approx.)			
			1,900
VI. Vectorcardiograms			
			49

Respectfully,

LL:vr

/s/ LOUIS LEVY, II, M.D.

ELECTROENCEPHALOGRAPHY

The following is the annual report of the Department of Electroencephalography for the year 1964-1965.

July 1964	136	January 1965	117
August 1964	129	February 1965	112
September 1964	139	March 1965	129
October 1964	141	April 1965	115
November 1964	91	May 1965	125
December 1964	131	June 1965	145
TOTAL EEG RECORDINGS			1,510
1963-1964			1,248
TOTAL FETAL HEART RECORDINGS			49
1963-1964			34

There were 12 holidays. 231 EEGs went unperformed for reasons as follows: 77 appointment cancellations too late to substitute, 6 patients (mostly psychotic) refused test on arrival at laboratory, 114 patients failed ever to appear, 1 requisition form unsigned by referring doctor and/or otherwise incomplete, 33 patients for whom EEG appointments had been made were discharged from hospital without cancellation of appointments.

Respectfully submitted,

/s/ H. THARP POSEY, M.D.

Director,

Brain Wave Station

HTP:pp

LUNG STATION

During the fiscal year beginning July 1, 1964, the Lung Station continued to function as a service and diagnostic unit. Studies of ventilatory function were performed on 806 patients. Dynamics of breathing and distribution of ventilatory function were studied in 61 individuals. Arterial blood gas studies were conducted on 24 patients, and oxygen consumption on 35 as a service to Pediatric Cardiology. Lung biopsies, intracavitary injections, and pericardiocentesis accounted for 11 procedures.

In accordance with our policy of restricting intermittent positive pressure breathing therapy to those outpatients in dire need, this modality was used on 43 occasions.

The stimulation of bronchial exudate by the inhalation of a heated aerosol of hypertonic saline and the subsequent collection of sputum for culture and cytology was performed on 522 individuals. This is a considerable imposition on Lung Station space and personnel. It is an outstanding diagnostic service, but requires utilization of one laboratory for the entire morning and the constant attendance of one of the Lung Station personnel. This function belongs in the Division of Inhalation Therapy.

Respectfully submitted,

/s/ JOHN H. SEABURY, M.D.

Director, Lung Station

Charity Hospital of La. at N.O.

VI. Non-Natal Mortality: (Newborn deaths occurring on 10th Floor) .585%

TUMOR REGISTRY

PURPOSE

- (1) To provide the medical profession of this Hospital with statistical and other data to indicate the size and nature of the cancer problem at this Hospital since January 1, 1948.
- (2) To make available to the medical staff information for research studies, for the evaluation of therapy, and for teaching.

ADMINISTRATION

The governing Board of the Registry consists of the following representatives of the sponsoring agencies listed below:

Charity Hospital of Louisiana at New Orleans

Dr. Leo J. Kerne

Dr. Manuel Garcia

Louisiana State University School for Medicine

Dr. W. W. Frye

Dr. Ronald A. Welsh

Tulane University School of Medicine

Dr. E. T. Kremenz, Chairman of the Registry Board

Dr. Robert Craft Smith

American Cancer Society, Louisiana Division, Inc.

Dr. C. C. Sprague

Louisiana State Board of Health

Dr. J. M. Bruce

Louisiana State Medical Society

Dr. Ambrose H. Storek

Loyola University School of Dentistry

Dr. Victor Halperin

REGISTRY STAFF

The following seven staff members, in addition to the Director, have performed the work of the Registry during the year: Analytic Assistant, Mrs. Marjorie S. Krennerich; Follow-Up Secretary, Mrs. Marie Louise Nolan; Abstractors and Code Clerks, Mrs. Scott M. Bianco, Mrs. Betsy Green and Mrs. Loretta T. Soles; Key Punch Operator, Mrs. Anne Fos, and File Clerk, Mrs. Myra L. Fiorella. There are in addition two vacancies.

VOLUNTEERS

In the summer of 1964, as in the summer of 1963, volunteers contributed time to the work of the Registry. The Registry is most grateful to Miss Adrienne Luc, Miss Marie Mouton and Miss Claire Ogden, who did some of the preliminary work in the field of follow-up.

FINANCIAL SUPPORT

Support is derived from Charity Hospital, grants from the American Cancer Society, Louisiana Division, Inc., and the Louisiana State Board of Health, and from a contract with the End Results Section of the National Cancer Institute.

STATUS OF RECORDS

As of June 23, 1965, there were on file in the Registry abstracts and punch-cards summarizing pertinent data on 27,835 malignancies diagnosed in the sixteen year period, 1948-1963, in patients seen at Charity Hospital. The status of the patients (alive/dead) in 1964 or 1965 was known for all but eight-tenths of one per cent of the patients.

SUMMARY OF 16-YEAR PERIOD, 1948-1963

A. Distribution of Malignancies by Race and Sex.

Race:		
White	13,944	
Negro	13,891	
Total	27,835	
Sex:		
Male	14,374	
Female	13,461	
Total	27,835	

B. Distribution of Malignancies by Site of Most Frequent Occurrence.

Cervix uteri	3,530
Skin (excluding melanoma)	3,408
Lung	2,624
Breast	2,142
Prostate	2,020
Stomach	1,494

These six sites account for more than fifty per cent of the total number of malignancies.

C. Status of Patients.

Alive at last contact	6,919	24.8
Dead	20,801	74.7
Untraceable	115	0.4
	27,835	99.9

D. Observed Survival Rates to Fifteen Years after Diagnosis.

	1 Yr.	5 Yrs.	10 Yrs.	15 Yrs.
All sites	55.5	31.1	20.8	14.2
Cervix uteri	77.1	48.4	39.3	30.9
Skin (excluding melanoma)	91.7	69.4	48.5	31.1
Lung	16.8	4.3	2.0	*
Breast	75.0	38.1	23.4	16.5
Prostate	67.6	27.8	9.9	4.3
Stomach	20.8	6.5	4.2	*

*Rates may be unreliable because of the small number of patients surviving fifteen years (almost the entire span covered by the Registry).

REPORTS

During the year 40 studies were done for 30 Charity Hospital physicians and 1 dentist. In addition 3 studies were done for medical students who were writing theses. Examples of these studies include an analysis of deaths from basal cell carcinoma, long term survival in lung cancer, relationship of age, stage and treatment to survival for testicular tumors and survival of patients with breast cancer by stage and treatment.

A number of the 40 studies were done in order to provide background material for internes and residents who were preparing to present unusual cases of cancer as a part of their training program.

The Registry has also given other Hospital departments, upon request, recent information concerning specific patients and has, also upon request, given other hospitals information about policies and procedures involved in the operation of a registry.

PUBLIC RELATIONS

An exhibit showing the purpose and organization of the Registry and some of the publications based on Registry data was displayed at the annual meeting of the Charity Hospital medical staff on October 1, 1964, and again

at the annual meeting of the American Cancer Society, Louisiana Division, Inc., on October 9, 1964. This exhibit was so well received that it was borrowed this spring by the American Cancer Society for use in Lake Charles.

A brief talk on the Registry was given to each of the three sections of Tulane Junior medical students (September 23, 1964, February 2, 1965, and March 9, 1965) and to the Hospital's Volunteer Advisory Committee (January 7, 1965).

Either the Registry Director or the Analytic Assistant has attended all L.S.U. and Tulane Tumor Conferences in order to provide appropriate statistics (when possible) and in order to become familiar with the Hospital's cancer treatment courses.

PARTICIPATION IN NATIONAL PROGRAMS

The Charity Hospital Registry continues to participate with eight other hospital registries and three central registries in the End Results Evaluation Section of the National Cancer Institute. Dr. Robert F. Ryan is Chairman of the Section's Medical and Technical Advisory Committee and a member of the Executive Committee. Miss Robertson attended the Annual Meeting in Hartford, Connecticut, April 23, 1965, and Dr. Ryan, Miss Robertson and Mrs. Krennerich attended a Workshop in Indianapolis, June 2-4, 1965.

SPACE

In the spring the Hospital replaced the worn floor and installed new lighting in W-611. This markedly improved the working conditions in the Registry.

The staff and I are most grateful to the Chairman of the Board, Dr. E. T. Kremenz, who has given his time to the Registry's problem; to the Registry's three consultants, Mrs. Marion Wogan, Dr. Robert F. Ryan and Dr. Ronald A. Welsh; to the Director of the Hospital, Dr. Leo J. Kerne, and to the many departments of the Hospital which have co-operated with the Registry this year as in the past.

Respectfully submitted,

/s/ (MISS) BRENT S. ROBERTSON
Director, Tumor Registry

INTAKE DEPARTMENT

TRAFFIC SUMMARY

Total Intake traffic volume for the year in the Colored Section was:
52,618 Interviews processed.

In the White Section:
22,353 Interviews were processed.

In the Colored Sections:

- 11,578 applicants were made Eligible.
- 12,909 applicants were made Ineligible.
- 2,679 applicants were given Temporary Eligibility.
- 2,713 applicants were given Limited Eligibility.
- 7,765 applicants were DPW cases, and
- 15,780 applicants are still being investigated.

In the White Section:

- 5,620 applicants were made Eligible.
- 7,451 applicants were made Ineligible.
- 1,226 applicants were given Temporary Eligibility.
- 2,508 applicants were given Limited Eligibility.
- 1,275 applicants were DPW cases, and
- 4,474 applicants are still being investigated.

Both sections registered increases compared with last year's volume:
7,928 more interviews were processed in the Colored Section.
1,094 more interviews were processed in the White Section.

Average number of interviews processed in the Colored Section was:

	Daily	Weekly	Monthly
	144.15	1011.88	4384.79

Average White interviews processed were:

	Daily	Weekly	Monthly
	61.24	429.86	862.75

The highest volume registered in the Colored Section was:
5,043 Interviews processed (June, 1965)

The lowest monthly volume registered in the Colored Section was:
3,458 Interviews processed (December, 1964)

In the White Section, the highest monthly volume registered was:
2,056 Interviews processed (August, 1964)

And the lowest monthly volume registered in the White Section was:
1,634 Interviews processed (December, 1964)

SOCIAL SERVICE DEPARTMENT

Below is submitted the report of the Social Service Department for the fiscal year 1964-1965.

This Department was established to give services to patients whose medical problems make it impossible to maintain their regular way of living. Such problems might include the incapacitating illness of the bread winner, or of the mother or homemaker, and illness of a child which might seriously interfere with his education, and general social development.

The workers in the Department work closely with the medical and nursing staff, who refer to us the patients who might benefit by our services. Since we are a comparatively small department for such a large hospital, our workers cannot see every patient admitted, nor is this necessary, since every patient does not need our services.

A single case is cited below to illustrate the types of tasks performed:

A young woman, aged 29, was found in clinic to have a severe, acute heart condition. Immediate hospitalization was recommended, but the patient could not comply with the doctor's recommendations because she had five young children for whom she was responsible. The Social Worker assigned to the clinic was called by the doctor, explored with the patient the possibility of relatives or friends to take care of the children. The conclusion was that there were none, therefore outside help would have to be sought. The aid of Child Welfare Division of the Department of Public Welfare was sought, and temporary foster home care for the children was effected. Following her discharge from the hospital, which was complicated by an emotional disturbance probably resulting from the strain of her very complicated social problems, she has made a reasonable good adjustment, and it appears that the family will become a sound unit again.

Each ward and clinic has a social worker assigned, who receives calls from doctors, nurses, or other interested individuals. Depending upon the needs of the particular service, the worker may make rounds with the medical or nursing staff, or may anticipate calls from either as the need arises.

During the past fiscal year a total of 38,048 patients were helped with social problems. These varied from the very complicated to the relatively simple. In the more complicated, permanent records were kept on 14,400; temporary records were kept on 23,648.

It is of interest to know the source of referral of patients served by the department.

Source of Referral	No. of Patients
Hospital Personnel	15,021
Department of Public Welfare	2,258
Other Agencies	720
Patient or Patient Group	20,049
TOTAL	38,048

Since this is a State Hospital, the residence of patients served is also significant:

Place of Residence	No. of Patients
Orleans Parish	24,751
Other Parishes	13,091
Other States	206
TOTAL	38,048

USE OF FUNDS

Certain small funds are available to the Department to meet small emergency needs of patients, (such as medications needed immediately, for which the patient cannot pay). These funds are derived from Hospital appropriations, and from several bequests. Expenditures from them are as follows:

Reason for Using Fund	No of Patients	Amount Expended
Medication	22,141	\$12,419.26
Transportation	151	264.00
Maintenance	15	92.00
Appliances	710	2,012.00
TOTAL	23,017	\$14,787.26

STAFF

There has continued to be considerable turnover in staff. This is due to a general shortage of trained social workers, as well as to the fact that salaries in this department are not competitive.

A positive development has been the institution of a Case Aide Program. The case aide position requires a Bachelor Degree (as contrasted to the graduate training required for the Clinical Social Workers). We have been remarkably successful in recruiting a high caliber of workers for these positions. These workers are performing well, and are able to relieve much of the pressure on staff.

Another positive development has been the reallocation of two Clinical Social Workers I to Clinical Social Workers II. This was possible without increasing the budget of the department, since the reallocation of the positions mentioned above represented a considerable financial saving.

Outstanding problems continue to be lack of privacy for interviewing, overcrowding in the workers' offices, and the intolerable heat in the unit on the psychiatric wards.

Respectfully submitted,

/s/ MARIGAYLE H. HART, ACSW

LAUNDRY

The Laundry has processed from July 1, 1964 through June 30, 1965 the following, including all Wards, all Departments and all Buildings:

Total Weight 7,755,537
Quantity 15,458,902

Sincerely,

/s/ CYRIL J. ALLAIN
Laundry Superintendent

ENGINEERING DEPARTMENT

BOILERS

The six boilers in the Power House with a capacity of 2,850 Horse Power are chemically treated and operated on monthly intervals and inspected yearly, externally and internally by the Travelers Insurance Company's Inspectors, cleaning of the boilers are made immediately after taking out of service. If repairs are needed between yearly inspections, the Inspectors are called and recommendations are completed. Painted Main Gas Line for boilers in basement of Power House which is done yearly to prevent deterioration, because of heat and condensate moisture.

HEATERS ON MEZZAINE FLOOR IN POWER HOUSE

The heaters supplying Hot Water to the boilers in the Power House, Laundry and all Hospital Buildings are in satisfactory condition, they are operated on monthly intervals.

WATER SOFTENERS

Cleaned stone bed thoroughly in each Brine Tank, scaled and painted exterior of the Four Water Softeners, also routine repairs on Units.

ICE WATER SYSTEM

Operating O.K.

ICE PLANT

Converted the Cooling Tower from Ayers to a Marley, equipment consisting of complete Gear Box, Couplings and Eight New Fan Blades, Plant operating O.K.

WORTHINGTON AIR CONDITION COMPRESSORS

(1000 Tons to Main Building)

Made yearly inspection on both No. 1 and No. 2 Freon Compressors, checked alignment, installed New Thrust Bearings, put 200 lbs. of Freon (11) in evaporators on both Compressors, cleaned Condensers, painted interior and heads of both Units

TRANE AIR CONDITION COMPRESSORS

(700 Tons to Main Building)

Made thorough inspection and minor adjustments on system, operating O.K. These both Central Units deliver chill water to certain sections of the Main Building for Air Condition.

EMERGENCY GENERATORS

General Motor 1000 K. W. Diesel Emergency Generator & Murray Turbo Generator 1000 K. W. run Generators semi-weekly throughout the year. Installed New Solenoid Valve controlling air for starting Generator.

The 300 Ton Carrier Absorption Air Condition and Heating System has been completed and operating in the Student Nurse's Home, adjustments have to be made, otherwise, satisfactory.

25 tons of Air Condition was installed in the Colored Dining Room in basement of the Main Building, chill water to the Unit is delivered from the

Trane Unit in the Power House, operating satisfactory. O.K.

Made several Plant shut-downs for necessary repairs during the past year.

Employees in the Engineering Department repair window units, ice making flake and cube machines and all equipment operated by the Engineering Department in the Hospital.

Hoping that this report meets with your approval, I remain,

Yours very truly,

/s/ WILLIAM H. SUTHERLAND
Plant Engineer

PHARMACY DEPARTMENT

Special Prescriptions Filled	148,582
Stock Prescriptions Filled	70,994
Narcotic Prescriptions Filled	12,963

Total Prescriptions Filled 232,539

The Pharmacy services all wards and clinics, including such outlying areas as the Dibert and Contagious Buildings, Tulane Metabolic Ward, Tulane Arthritis Unit, and the Tulane Cancer Clinical Research Unit.

In the general manufacturing laboratory and prescription counter, a total of 58,300 gallons were made. These included syrups, elixirs, liniments, lotions, mixtures and laboratory stains. 933 pounds of ointments and 1,277,600 tablets were also manufactured.

In the solution area, the total number of bottles of sterile solutions manufactured reached 229,264. These include 1000 cc and 500 cc sodium chloride, dextrose, etc. In addition to this 88,774 bottles of small size sterile solutions were made, and the number of sterile vials of vitamins, potassium chloride, phenobarbital, mineral oil, etc., was 26,734. Various dilutions of allergenic vials made for use in the clinics numbered 1,467. The grand total for the solution room stands at 346,239 units. This represents a tremendous savings to the hospital as commercially prepared products would cost many times our manufactured items.

Respectfully submitted.

/s/ SYLVIA BING
Director, Pharmacy Department

PREMATURE CENTER

MAINTENANCE DEPARTMENT

The Maintenance Department when fully staffed consist of 151 workers. At the present time there are 12 vacancies.

This department has handled 24,176 written requests for maintenance during the past year. The following figures are given to indicate the volume of work and type of service rendered.

- 258 serious leaks due to pipe deterioration.
- 15 major repairs to equipment.
- 3 pieces of new equipment installed.
- 1,299 pieces of new furniture or equipment manufactured under \$100.00.
- 50 pieces of new furniture or equipment manufactured over \$100.00.
- 4,204 gallons of paint material used.
- 2,146 new keys issued.
- 3,652 pieces of metal furniture completely stripped and refinished.
- 10 renovation of jobs completed.

	Maintenance Work Orders	Hospital Requisitions	Total
